M M

78 encoded characters including space and the maker's portrait at U+F8FF; lowercase keys set the capitals. Every character is 660 units wide at every weight; no kerning. Figures, printable ASCII punctuation and symbols, curly quotes, dashes, ellipsis, bullet. No accented letters. Variable weight 100–900 with seven named instances. Companion to Ejecta.
Full inventory and weight slider: ../specimen.html

UTYPEIA / EDITION 01 / VERSION 1.000

EJECTA

TELEMETRY

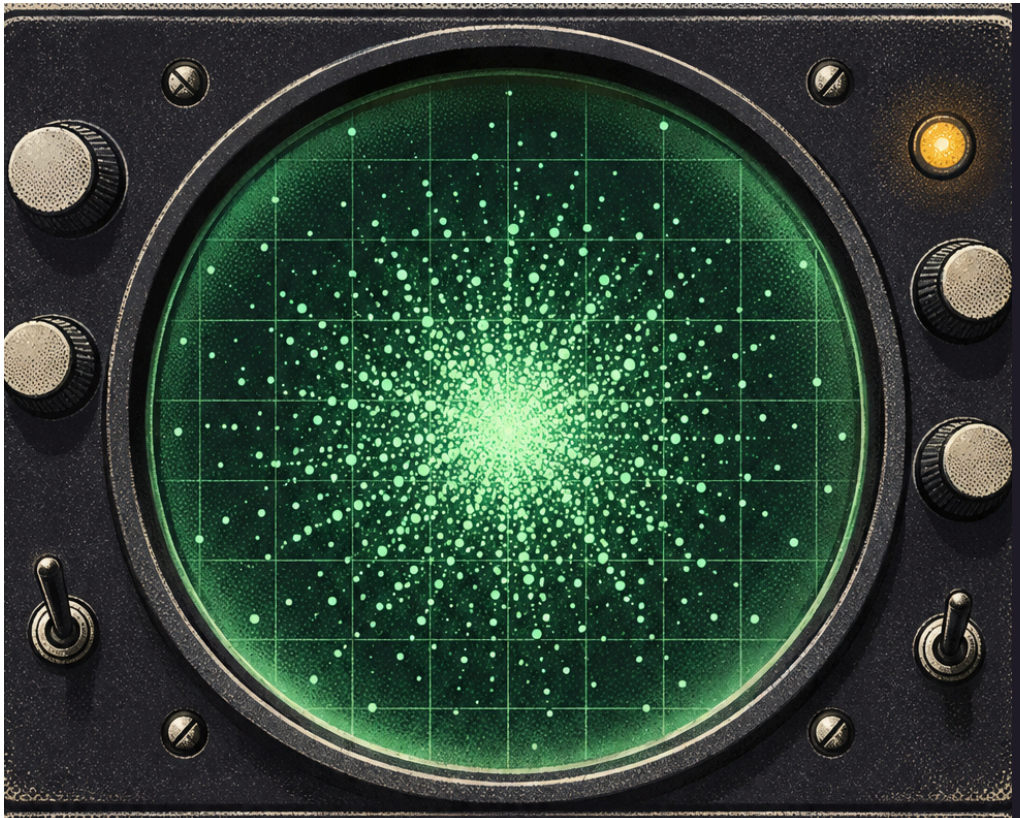

Every character, the space and the maker's portrait sit in the same 660-unit cell, at every weight. A narrow I gets slab terminals and a wide W condenses, so the columns stay true. There is no kerning: it would break the grid.

```
01 FOR P IN PARTICLES {
02   R = P.RADIUS * 0.92;
03   IF (WGHT > 400) {
04     D = BLAST[P.Q];
05     P.X += D * COS(A);
06   }
07   DRAW(P); // ONE CELL
08 }
09 #DEFINE CELL 660
10 RETURN "OK";
```

Brackets, braces, operators, quotes and the underscore sit centred in their cells. The program is invented; the type is Ejecta Mono Regular.

A FICTIONAL TERMINAL

```
> RUN IMPACT.SIM
PARTICLES ... 381
SEED ..... 0X3B
STATUS: SCATTERING_
```

T+00 100 THIN

T+01 300 LIGHT

T+02 400 REGULAR

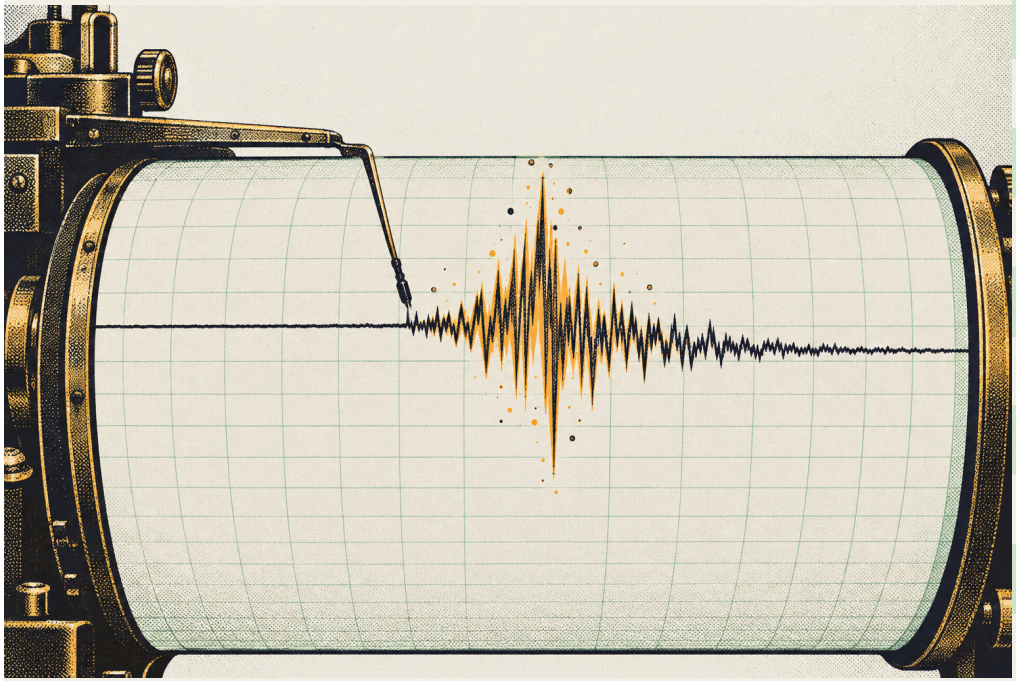

T+03 500 MEDIUM

T+04 700 BOLD

T+05 800 EXTRABOLD

T+06 900 BLACK

Seven named weights, one per line. The columns hold while the letters break up.

SPIKE AT T+04:12

AMPLITUDE 9.7 / DECAY 31 S

Fictional record. Bold sets the event, Regular the readings, in the same cell width: swap one weight for another and nothing moves.

EVENT	TIME	RANGE	N
IMP-1	04:12:07	3.5 KM	381
IMP-2	04:12:09	1.8 KM	214
EJ-07	04:12:11	0.6 KM	96
EJ-08	04:12:14	2.2 KM	155
SUM	------	8.1 KM	846

"STILL SETTLING." / (LOG 14)

Figures, columns and punctuation in Ejecta Mono Light and Regular. Every character takes one cell, so tables line up without tabs.
