

UNKELCHUNK

THE WEIGHT OF STONE

CUT FROM THE BLOCK

Every shape in Unkelchunk is a rectangle or a right-angled triangle. Nothing bends.

SLAB

A slab under every stem, tied back by a bracket.

BEAK

Open arms end in a hanging triangle.

CHAMFER

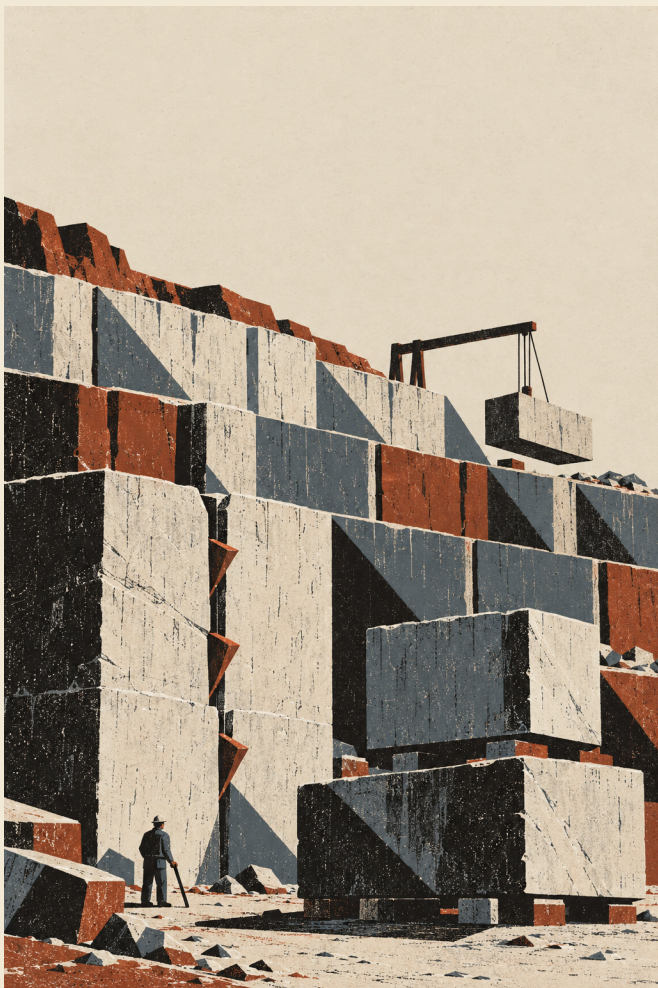

Rounds are rectangles with corners cut off.

WEDGE

C and G open with a triangular mouth.

DIAGONAL

Drawn 140 thick, measured square across the stroke.

200 / 140 / 70

Measured on the actual outlines, in units of a 1000-unit em.
The crossbar centres on 350, half the cap height. Every block under a slab is 160 tall, so the bracket ends where the block does.
Figures stand at the same 700 as the capitals.

NO CURVES.

U+0030	U+0031	U+0032	U+0033	U+0034
0	1	2	3	4

5	6	7	8	9

1.600

12:30 / 100%

[1926 – 2026]

The figures share the capitals' 700-unit height, their stems and their chamfered corners. Punctuation tapers to the same hard angles.

KEILSTEIN

The face was first worked under the title Keilstein, German for "wedge stone": the wedge-shaped stones that lock an arch. Every triangle in these letters borrows that shape.
